Enabling code for RailPlanner

Your subscription to RailPlanner is validated by the enabling code you receive when you renew your subscription.

To apply the new code:

- Open RailPlanner
- Click Help on the menu bar
- Click About
- Click Change Enabling Code on the right-hand side
- Enter the new code (this must be copied in 2 parts)
- Click OK – OK – OK
- Restart RailPlanner
- Check the new code has been accepted.

Server installations may require restarting the services.exe for the change to take effect.
